

LUCENTE®

LUCENTE®

Parlare di Luce...

Lucente è situata nella provincia di Treviso, dove si trovano anche gli stabilimenti produttivi. L'azienda controlla e gestisce tutte le fasi del ciclo produttivo: progettazione e sviluppo del prodotto, progettazione e costruzione degli stampi di produzione, stampaggio, lavorazioni di metalli e trattamenti delle superfici di verniciatura, assemblaggio e imballaggio del prodotto finito, controllo qualità e commercializzazione.

In tutte le fasi della produzione **Lucente** pone massima attenzione nell'uso responsabile delle risorse, nella minimizzazione degli sprechi e nella riduzione del consumo energetico ottimizzando i processi produttivi.

Lucente si impegna nello sviluppo di prodotti che riducano il consumo di energia durante l'utilizzo, attraverso l'impiego di fonti luminose alternative all'incandescenza e con l'utilizzo di ballast elettronici nelle lampade a fluorescenza che permettono una migliore efficienza dell'installazione.

La collezione **Lucente** parla di luce attraverso le sue collezioni che esprimono idee forti e che possiedono una personalità speciale. Le idee diventano materia anche attraverso la collaborazione con personalità diverse dal mondo del design, interpretando il pensiero di grandi professionisti e restituendo progetti che dimostrano tutta l'intuizione trasformata in semplicità.

Lucente è una combinazione di eleganza, di forme organiche e funzionalità, un progetto nato sulla convinzione che gli oggetti con un buon design possano migliorare la qualità della vita grazie alla loro estetica funzionale. La luce è capace di cambiare atmosfere e stati d'animo, **Lucente** cerca di interpretarne le sue molteplici applicazioni nella vita quotidiana.

Talking about light...

*The company **Lucente** has always been located in the province of Treviso, where it controls and manages all stages of the production cycle: product design and development, design and construction of production moulds, moulding, processing of metals and treatment of painted surfaces, assembly and packing of the finished product, quality control and marketing.*

*In all production stages **Lucente** devotes the greatest attention to the responsible use of resources, to minimizing waste and reducing energy consumption by optimizing the production processes.*

***Lucente** is committed to the development of products that reduce energy consumption in use, employing alternative sources to incandescent light and using electronic ballast in fluorescent lamps that allow more efficient installation.*

***Lucente** talks about light through its collections which express strong ideas and have a special personality. Ideas become matter through collaboration with different personalities from the design world, interpreting the thought of great professionals and coming up with projects that demonstrate how intuition can be transformed into simplicity.*

***Lucente** is a combination of elegance, organic shapes and functionality, a project springing from the conviction that well-designed objects can improve the quality of life thanks to their functional aesthetic appearance. The light is able to change atmospheres and moods, Lucente tries to interpret its many applications in everyday life.*

Direttiva RAEE:

Rifiuti di Apparecchiature Elettriche ed Elettroniche

Il 25 Luglio 2005 il Consiglio dei Ministri ha recepito con Decreto Legislativo no 151 la Direttiva Europea 2002/95/CE e 2002/96/CE relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche e dello smaltimento dei rifiuti da essi derivanti. L'obiettivo è promuovere una logica di sviluppo sostenibile nel settore delle apparecchiature elettriche ed elettroniche, di cui gli apparecchi di illuminazione ne fanno parte, ai fini di un corretto trattamento dei prodotti a fine vita e ciò può attuarsi attraverso la piena conformità alla Direttiva RAEE.

Il Produttore, come definito dal Dlgs no 151, dovrà farsi carico dei costi di gestione che comprendono la raccolta, presso gli impianti di stoccaggio provvisorio e dello smaltimento dei rifiuti degli apparecchi di illuminazione immessi sul mercato dopo l'Agosto 2006.

Per adempiere a questi obblighi di legge LUCENTE S.r.l. ha deciso di avvalersi del supporto del Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milano Tel 02 33600732.

Gli apparecchi di illuminazione saranno marcati in modo da identificare il Produttore e riportare il simbolo del cassonetto barrato, indicante la raccolta differenziata separata dal resto dei rifiuti urbani, inoltre saranno soggetti al contributo di smaltimento, differenziato per fascia di peso. Gli utenti finali potranno consegnare i suddetti apparecchi senza costi aggiuntivi presso i punti di raccolta appositamente realizzati e comunicati dal Consorzio.

I distributori sono obbligati ad assicurare al momento della fornitura di una nuova apparecchiatura, il ritiro gratuito, in ragione di uno ad uno, della apparecchiatura usata. L'obbligo di informazione relativo al contributo dovrà essere mantenuto visibile in fattura, da parte del Produttore, fino al 13 febbraio 2011.

I prodotti elencati con il relativo peso netto alla fine del presente catalogo saranno soggetti al contributo di smaltimento a seconda della fascia di peso di appartenenza:

- fascia 1: apparecchi il cui peso è compreso tra 0 e 2 Kg
- fascia 2: apparecchi il cui peso è compreso tra 2 e 8 Kg
- fascia 3: apparecchi il cui peso è superiore a 8 Kg

Direttiva RoHS

Il Decreto Legislativo sopra menzionato incorpora anche la Direttiva 2002/95/CE - RoHS - Limiti d'uso di alcune sostanze pericolose - relativa alla riduzione delle sostanze pericolose nelle apparecchiature elettriche ed elettroniche.

A partire dal 1° Luglio 2006 tutte le nuove apparecchiature elettriche ed elettroniche immesse sul mercato non dovranno contenere o contenere in misura limitata sostanze quali:

- Piombo
- Mercurio
- Cadmio
- Cromo esavalente
- Bifenile polibromurati (PBB)
- Eteri difendi polibromurati (PBDE)

WEEE Directive:

Waste Electrical and Electronic Equipment

On the 25th July 2005, the Council of Ministers incorporated the European Directive 2002/95/CE and 2002/96/CE – related to the reduction of hazardous substances in electronic and electrical equipment and their waste disposal - into Italian legislation with the Legislative Decree number 151. The objective is that of promoting a notion of sustainable development within the electronic and electrical equipment sector, to which lighting equipment belongs, with the aim of correctly treating the products once they have reached the end of their lives; this may be accomplished by fully complying with the WEEE Directive. The Manufacturer, as defined by the Legislative Decree number 151, will be responsible for the management costs which include collection from temporary storage facilities and the costs for waste disposal of the lighting Equipment. In order to fulfil these legal obligations LUCENTE S.r.l. have decided to call upon the support of the ECOLIGHT Consortium; Consorzio ECOLIGHT, Via Gattamelata 34, 20149 Milan Tel. +39 02 3360 0732.

The lighting equipment will be marked in such a way as to identify the Manufacturer and show the symbol of the crossed wheeled bin, which indicates a separate collection from the rest of the urban waste, the equipment will also be subject to a disposal contribution and will be distinguishable by its weight range. The contribution will be determined prior to the law coming into force and will be made official by the ECOLIGHT Consortium. The end users will be able to deliver the above-mentioned equipment without any add-on costs to the authorised collection sites as notified by the Consortium.

Distributors are obliged to ensure a free take-back service of the used equipment, at the time of the supply of a new unit, on a one-to-one basis. The Manufacturer has a duty to supply and maintain information related to the amount of contribution and this must be shown on invoices until 13th February 2011.

The products listed in this catalogue will be marked with range symbols. Each symbol should be shown against its relevant range within the following table and each range will be subject to a different disposal contribution:

- range 1: the equipment weight which is between 0 and 2 kg
- range 2: the equipment weight which is between 2 up to 8kg
- range 3: the equipment weight which is over 8kg

The RoHS Directive

The above-mentioned Legislative Decree has also implemented the RoHS 2002/95/CE Directive. The Restriction of the use of certain Hazardous Substances (RoHS) in electrical and electronic equipment.

As from 1st July 2006, all new electrical and electronic equipment put on the market must not contain, or contain limited quantities of, certain substance, namely:

- Lead
- Mercury
- Cadmium
- Hexavalent chromium
- Polybromide biphenyls (PBBs)
- Polybromide diphenyl ethers (PBDEs)
